

Kibreab Kebede Debisa

STATISTICS UNDERGRADUATE | DATA ANALYSIS & INFORMATION MANAGEMENT

Addis Ababa, Ethiopia | +251 976 031 234 | kibreyo@yahoo.com | [LinkedIn](#)

EDUCATION

Addis Ababa University Bachelor of Science in Statistics

Oct 2023 - Jun 2027 (expected)
Senior, 2026/27 academic year

RELEVANT COURSEWORK

Statistical Inference, Regression Analysis, Time Series Analysis, Sampling Techniques, Experimental Design, Data Management, Multivariate Analysis, Survey Methodology, Biostatistics, Statistical Computing, Applied Spatial Statistics and Demography.

SKILLS

Data & statistical tools

R Programming (tidyverse, ggplot2), Microsoft Excel and SPSS

GIS & mapping

QGIS for spatial data preparation, thematic mapping, visualization and map layouts

Reporting & design

Microsoft Word, PowerPoint, Google Sheets, Canva and Adobe Express

Core capabilities

Data manipulation

Visualization

Statistical modeling

Report writing

LANGUAGES

Amharic Native

English Fluent

HOBBIES

Hiking, playing football, watching basketball and reading novels.

PROFESSIONAL INTERESTS

Information management, AI-assisted analytics, spatial statistics and evidence-based reporting.

PROFILE

Statistics undergraduate with practical experience in R, Excel, SPSS and QGIS, supported by academic and personal projects in data preparation, predictive modeling, time-series forecasting and analytical reporting. Skilled at transforming complex data into clear visualizations and evidence-based insights, with a strong interest in information management and AI-assisted analytics.

EXPERIENCE

Customer Churn Prediction using R

PERSONAL PROJECT

Developed a customer churn prediction project by preparing raw customer data, exploring features and analyzing relationships between customer attributes and churn behavior.

Applied statistical analysis and visualization techniques to identify influential retention factors, then documented a reproducible R workflow on GitHub.

Entropy-Based Binning in R

AAU PROJECT

Researched Shannon entropy, information gain and the MDLP stopping criterion; completed manual calculations and implemented recursive discretization from scratch in R. Evaluated bin quality quantitatively and compared the method with baseline alternatives.

House Price Prediction

AAU PROJECT

Developed regression models for a synthetic dataset with severe heteroscedasticity and mixed predictor types. Applied transformations, diagnostics and rigorous modeling techniques to improve robustness and interpretation.

Traffic Accident Time-Series Forecasting

AAU PROJECT

Built a Box-Jenkins ARIMA workflow to assess historical accident trends, detect seasonality and forecast future occurrences. Communicated findings through statistical visualizations and structured analytical reporting.

EXTRACURRICULAR ACTIVITIES

Event Co-Organizer & Photographer

Liter Events

Contributed to event planning, coordination and on-site delivery while documenting activities through photography and supporting visual content creation.

University Basketball Team Player Addis Ababa University

Represented the university basketball team while balancing academic responsibilities, strengthening teamwork, discipline, resilience and communication.
